Hello—

A quick note to catch Jennifer up and discuss a bit of logistics...

The kickoff call went quite well. Abt knows what they need to do and should be able to provide a review of the document in time for the meeting with the RA next week. They estimate about 16 hours LOE for this piece.

On the call, we discussed possible follow-up tasks related to the benefits analysis. As we understand it, these are still somewhat in flux and we'll wait to hear more from EPA on those. The LOE will vary, depending on what needs to be done.

On a WA management note, we're at about 24% spent as of 7/12/15, leaving over \$28,600. Clearly, that'll be more than enough to complete the memo for this week. But we may need to revisit budget numbers again once you decide on follow-up tasks. We'll need to set aside some funds for project management stuff (progress reports, etc) and for closeout (with this being the last year of the contract, these may be larger???). Also consider that Abt's rates are generally higher than Tt's, so they'll burn through the budget a bit faster. Again, not a big concern, but just wanted to provide an update as to where we are and we'll see how things shake out in the coming months.

Please let me know if you have any questions.

Thanks!

Kelly

Kelly,

Please provide technical assistance to EPA Region 1 in accordance with Work Plan for the task outlined below. Please schedule a kick-off meeting with Region 1 to discuss this task.

TASK: Assistance reviewing Entergy's assessment of costs and benefits related to Clean Water Act Section 316(b) requirements for Pilgrim Nuclear Power Station (PNPS), Plymouth, MA

In June 2008, Entergy submitted an *Economic Assessment of Fish-Protection Alternatives at Pilgrim Nuclear Power Station* (the 2008 Economic Report) prepared by NERA Economic Consulting for Entergy. EPA is requesting assistance to review the accuracy of the benefits analysis in the 2008 Economic Report for the purpose of comparing the costs and benefits of available fish protection technologies at PNPS. First, EPA requests an assessment of the estimated commercial and recreational benefits presented in the 2008 Economic Report. Second, EPA requests an assessment of the Report's analysis of non-use benefits. Finally, where deficits or inconsistencies in the benefits analysis are identified, EPA requests an assessment of the information and analysis needed to address these gaps.

thanks

Jennifer Chan
